code review beats testing evidence from decades of programming research michael favia october 3 2011 at 6 02 pm thanks  
for the great article quite informative as if to prove your point you have a bug in your article i found after a quick code read,  
**assert when should assertions stay in production code** - thomas yes i have code complete and must say i strongly  
disagree with that particular advice say your custom memory allocator screws up and zeroes a chunk of memory that is still  
used by some other object, **clean code a handbook of agile software craftsmanship** - even bad code can function but if  
code isn t clean it can bring a development organization to its knees every year countless hours and significant resources  
are lost because of poorly written code
