

an extension of casson s invariant am 126 on jstor - in lectures at msri in 1985 andrew casson described an integer valued invariant of oriented homology 3 spheres see also am m can be thought of counting the number of conjugacy classes of representations $1 \times m \times 2$ in the same sense that the lefschetz number of a map counts the number of fixed points , **walker k an extension of casson s invariant am 126** - an extension of casson s invariant am 126 volume 126 kevin walker let $w \times f$ be a heegaard splitting of a rational homology sphere m then $l \times m$ is declared to be an appropriately defined intersection number of $r \times w$ and $r \times w$ inside $r \times f$ the definition of this intersection number is a delicate task as the spaces involved have singularities a formula describing how l transforms under dehn surgery is proved, **an extension of casson s invariant am 126 kevin walker** - this is a monograph describing walker s extension of casson s invariant to $q \times h$ s this is a fascinating subject and walker s book is informative and well written it makes a rather pleasant introduction to a very active area in geometric topology bulletin of the american mathematical society, **an extension of casson s invariant am 126 volume 126** - annals of mathematics studies this book describes an invariant l of oriented rational homology 3 spheres which is a generalization of work of andrew casson in the integer homology sphere case let $r \times x$ denote the space of conjugacy classes of representations of $p \times x$ into $su \times 2$ let $w \times f$ be a heegaard splitting of a rational homology sphere m , **an extension of casson s invariant ebook 1992 worldcat** - describes an invariant l of oriented rational homology 3 spheres which is a generalization of work of andrew casson in the integer homology sphere case, **an extension of casson s invariant am 126 volume 126** - in the press this is a monograph describing walker s extension of casson s invariant to $q \times h$ s this is a fascinating subject and walker s book is informative and well written it makes a rather pleasant introduction to a very active area in geometric topology, **an extension of casson s invariant am 126 volume 126** - this book describes an invariant l of oriented rational homology 3 spheres which is a generalization of work of andrew casson in the integer homology sphere case let $r \times x$ denote the space of conjugacy classes of representations of $p \times x$ into $su \times 2$ let $w \times f$ be a heegaard splitting of a rational homology sphere m , **an extension of casson s invariant book 1992 worldcat org** - this is a monograph describing walker s extension of casson s invariant to $q \times h$ s this is a fascinating subject and walker s book is informative and well written it makes a rather pleasant introduction to a very active area in geometric topology bulletin of the american mathematical society read more, **walker an extension of casson s invariant to rational** - bl s boyer and d lines surgery formulae for casson s invariant and extensions to homology lens spaces preprint zentralblatt math 0691 57004 bn s boyer and a nicas varieties of group representations and casson s invariant for rational homology 3 spheres preprint, **amazon com customer reviews an extension of casson s** - an extension of casson s invariant am 126 by kevin walker format paperback change price 59 14 free shipping with amazon prime write a review add to cart add to wish list search sort by top rated filter by all reviewers all stars all formats text image video there was a problem filtering reviews right now, **hiro s notes on the casson invariant and the lmo invariant** - the lmo invariant m is an element of the chord diagram algebra and each coefficient of the element gives us a numerical invariant 5 le murakami and ohtsuki showed that the first degree part recovers the casson walker lescop invariant
